# Systems Engineering

Capability Summary

Exceeds Expectations. Innovative. Tailored Designs.

Who We Are

Spencer Cole, LLC is an Advanced Engineering Systems company with significant expertise in command, control, communications, computer, intelligence, surveillance and reconnaissance systems. Our technical experts bring a wealth of experience in systems engineering and program management services gained while working on a myriad of missile, aviation, and land systems programs for the Department of Defense.

What We Do

Spencer Cole collaborates with each partner on all phases of the Systems Development Life Cycle (SDLC). Our domain experts deliver extensive knowledge in the areas of requirements capture, analysis, specification, traceability, and verification using the latest industry tools and standards. We support system design and development activities within the aviation, aerospace, defense and commercial industry, as well as many other federal agencies.

Our technical experts bring a wealth of experience in systems engineering and program management services gained while working on a myriad of missile, aviation, and land systems programs for the Department of Defense.

What We Do...*We transform the way our customers do business.*

Our comprehensive program execution approach provides our clients with needed technical support for those unique and varying assignments requiring specialized expertise. On those occasions when rare requirements arise, it has been our experience that clients seek service providers who are familiar with their internal operations, customer base and products, Spencer Cole provides the following services to meet these programmatic needs.
