

NAICS Codes

541330 | 541614 | 541618 | 541690 | 541712

Certifications

EDWOSB
VA DBE
VA SWaM Certified
WMATA S&LB
2011 Protégé—GSA Mentor Protégé Program

Services & Solutions Offering includes:

Management

Program Consultants
Trade Studies

Engineering Design and Development

Electrical Engineering Design
Mechanical Design

Product Evaluation

Systems Integration & Test
Verification and Validation
Accreditation

Specialty*/Engineering

EEE E³ (Electromagnetic Environmental Effects) Analysis, Design & Test Support
Reliability Engineers
Maintainability Engineers
Safety Engineers
Quality Engineering (SW, HW, Production and Test) and Logistics

We respond to requirements with rapid turnaround times! Inquiries welcome.

ADVANCED ENGINEERING SYSTEMS CONSULTANTS

Specialty Engineering

Capability Summary

Exceeds Expectations. Innovative. Tailored Designs.

Who We Are

Our Specialty Engineers support product and service development by applying multi-discipline knowledge to system design decisions, balancing total system performance and affordability. As a rule, specialty engineers support systems engineering development by performing one of five basic functions: reliability and maintainability, quality assurance, integrated logistics support, system safety, and producibility.

What We Do

Whether it is working with our clients mid-development, or up-front to define and establish the project plan and design requirements, we work with customers to address special system implementations where "special" management and science factors need to be considered to determine their affect on the project.

How We Do It

Lean Infrastructure. Preparation. Strategic Analysis.

...And, a commitment to delivering a quality product!
